

PRESS RELEASE

23 May, 2022

## UMILES returns to World ATM Congress as Expodrónica sponsor

UMILES will boast a 200 sqm stand at Expodrónica, set to take place at IFEMA Madrid on 21, 22 and 23 June, to showcase its disruptive take on advanced, sustainable, efficient ground and air mobility solutions.

After launching the first 100% Spanish air taxi last year, UMILES Next is currently working on a second prototype of the aircraft.

**Madrid, 23 May 2022.- UMILES Group**, Spain's leading provider of unmanned aerial systems (UAS) services, is to attend the World ATM Congress once again this year as sponsor of the Expodrónica pavilion, a unique space dedicated solely to Advanced Air Mobility (AAM).

The ninth edition of the **World ATM Congress** will be held from 21 to 23 June at **IFEMA**, Madrid. It is the world's largest manned and unmanned air traffic management (ATM/UTM) event and will attract a broad range of professionals from the aviation and drone industry, as well as representatives of civil and military institutions.

**Expodrónica** will showcase the sector's most innovative systems and efficient solutions, hosting over 180 exhibitors and featuring 200 sessions and presentations delivered by world leading experts in unmanned or remotely piloted aircraft systems.

The UMILES stand, spanning 200 sqm, will showcase a disruptive take on advanced, sustainable, efficient ground and air mobility solutions deployed through the group company UMILES Next, together with its technology partner **Tecnalia**. The stand will also display the company's expertise in unmanned aircrafts featuring 360° services through **UMILES UAVs**.

After launching the first 100% Spanish air taxi last year, UMILES Next, continues to enhance and develop its aircraft designs, based on its patented flight stability system, **FlyFree** technology, which provides maximum stability and safety for both passenger and freight transport and will be debuted at Expodrónica.

## About UMILES Group

**UMILES Group**, a leader in **unmanned aerial systems**, was founded in 2016 and was acquired by Grupo Ibérica in 2020. An international **company**, UMILES Group headquartered in Madrid has offices in Spain, Mexico and Croatia and operations in more than 10 countries, with offices set to open in the US and Chile in 2022. **UMILES Group has three group business: UMILES UAV, 4uJet and UMILES Next.**

**UMILES UAV** operates six business lines offering end-to-end tailored services for professionals both domestically and globally. Its core business lines of action include operation, training, manufacturing and management activities for unmanned aerial systems.

The executive aviation company **4uJet** offers short-haul services for passenger transport and organ transport for the ONT (National Transplant Organization).

By combining these two areas of activity in partnership with **tech provider Tecnalía**, the group has successfully debuted in urban mobility design through the company **UMILES Next**, positioning itself as the **global benchmark** in advanced, efficient, sustainable ground and air **mobility solutions**. This initiative is already revolutionising the air and ground mobility landscape, positioning Spain as a pioneer in innovation.
