## UMILES Next announces the incorporation of Óscar Lara as the company's new COO

**Madrid, September 21, 2022.-** UMILES Next announces the incorporation of Óscar Lara as the new Chief Operating Officer of the company. As director of operations, Óscar Lara will be in charge of the **coordination of processes and operations between** departments and will perform transversal functions in all of them.

Óscar holds a PhD in Aerospace Engineering from the Polytechnic University of Madrid and a Master's Degree in Finance from the OMMA Business School.

This incorporation reinforces the management team of UMILES Next, an ambitious and innovative project in the field of advanced solutions in air and land mobility.

With extensive experience in the management of international aerospace projects, previously Óscar Lara worked as director of strategy and innovation and was a member of the management committee of the company IberEspacio, an international reference company in the space sector of satellite systems and belonging to the Técnicas Reunidas Group.

Additionally, he worked as Operations Leader at E-USOC, the Spanish Operations and User Support Center, executing projects on the International Space Station with ESA and NASA and was a founding member of Theia Space, dedicated to the design, manufacture and operation of nano-satellites.

At the same time, he has a long teaching position at Omma Business School in Madrid and as a lecturer in various university master's degrees.

Carlos Poveda, CEO of UMILES Group: "We are very happy to have Oscar in the UMILES Next team, since his specialization in the aeronautical and aerospace sector brings great added value to a company that is committed to talent to continue advancing in mobility solutions".

### **About UMILES Next**

**UMILES Next** is the UMILES Group company focused on developing advanced air and ground mobility solutions. Pioneer in offering operators the innovative capacity to safely and sustainably address passenger and cargo transport thanks to the synergies of its own technology.

A path in which UMILES Next goes hand in hand with Tecnalía, its main technological partner, in order to lead air and land mobility, with the aim of competing internationally with exclusively national capital and technology.
